

## McGregor BGR100 100w & BGR250 250w rack mount mixer amplifiers

Compact 1U rack mounting mixer amplifiers designed for applications that require both mic and line level inputs with voice override facilities. Ideal as a background music amplifier and equally suitable for aerobic systems

- 2 x low impedance mic inputs (balanced or unbalanced) with rear mounted jack inputs
- MIC 1 accessible on the front panel via combination XLR & jack socket
- Externally adjustable priority override level (VOX) with vox active LED indicator - works with either mic to reduce the music level automatically when selected
- Three line level channels with volume control and separate bass and treble
- Overall master volume control
- 12 segment LED VU power output display with peak hold
- Active clip limiter (internally configurable on/off)
- 6.3mm jack connections for speakers
- Fan cooled

Available in two rack mount versions – 100w BGR100 and 250w BGR250
