

G591B and G591BW Soundlab black or white 150w ABS plastic 10" full range loudspeakers

A high quality ABS plastic cabinet with a 10" (254mm) driver, compression horn and built in 2 way passive crossover. The cabinet is designed to be used either as a conventional floor standing cabinet, a pole mounted unit (internal top hat included) or as a monitor cabinet

- Colour G591B - Black
G591BW - White
- Dimensions 530 x 390 x 365 mm
- Weight 10.1 kg
- Outputs 2 x Speakon sockets
- Driver 254mm
- Horn 25mm
- Impedance 8 ohms
- Power(rms) 150w

G591C

Soundlab black 200w ABS plastic 12" full range loudspeakers

A high quality ABS plastic cabinet with a 12" (300mm) driver, compression horn and built in 2 way passive crossover. The cabinet is designed to be used either as a conventional floor standing cabinet, as a pole mounted unit (internal top hat included) or as a monitor cabinet

- Colour Black
- Dimensions 625 x 410 x 340 mm
- Weight 17 kg
- Outputs 2 x Speakon socket
- Driver 300mm (12")
- Horn 25mm
- Impedance 8 ohm
- Power(rms) 200w

G743AB

Soundlab 150W Mono Mixer Amplifier with Digital Echo with carry handles

Affordable mono mixer amplifier with digital echo. The product features four channels. Each channel has an input for a balanced line microphone via a 3 pin XLR or a line input via 6.35mm mono jack and the following controls, high, low, reverb level, 20db attenuation and overall channel level control. Other inputs include a stereo input via 6.35mm mono jacks or phones with controls for high, low, reverb level, 10dB attenuation and overall level. The product further features master reverb and delay control, headphone output with level control, phantom power, bar graph level indicator, record out, aux out and overall level control. Output to the speakers is via 2 x 6.35mm jacks. Supplied in a metal case with carry handles.

- 150W output power
- 4 Mono and 1 stereo input
- Portable easy to use design
- Digital delay
- Phantom power
- Colour Black
- Dimensions 438x302x95mm
- Weight 10kg
- Packing Box
- Power RMS 150W @ 4Ohm
- Outputs 2 x 6.35mm Jacks

G743AC

Soundlab High Performance 2 x 100W 7 Channel Stereo Mixer Amplifier

High performance 7 Channel mixer amplifier. Channels 1-3 are mono mic/line channels and feature inputs for a microphone via 3 pin XLR or mono line input via 6.35mm jack. Each of these channels has control for high tone, low tone, monitor volume, effects level (for use with external processor) and over all channel level pre mixer.
