

TXA400 20w (max) with built in radiomic receiver
battery and mains operated sound systems for aerobics and poolside use.

This system can be supplied with either the hand-held or the TXS420sx bodyworn radiomic transmitter – it produces a respectable 20w (max) output from a normal 240v mains supply, internal D size batteries or a 12v vehicle battery. The unit also has an input so that you can connect your CD 'Walkman'. TXA400 is 220 x 290 x 155mm and weighs 3.3kg.

TXA300 60w (max) with built in radiomic receiver and optional CD player

These systems can be supplied with either the TXA300HT hand-held or the TXA300HSE bodyworn radiomic transmitters – the TXA300 produces 60w max (40w RMS). The units also have an input so that you can connect your CD 'Walkman' or MP3 player etc. and a cabled mic etc. TXA300 is 330 x 475 x 260mm and weighs 15kg from the built-in rechargeable batteries.

The TXA300HH is supplied with a handheld UHF radiomic – for meetings etc.

The TXA300HSE/HB is supplied with a headband UHF radiomic – for aerobics etc.

The TXA300HSE/L is supplied with a clothing clip UHF radiomic – for training etc.

The TXA300CD/HB is supplied with a headband UHF radiomic & integral CD player – for aerobics etc.
