

TXS890 UHF hand-held radiomic system

The TXS890 16 channel UHF radiomic system is easy to use and well constructed.

- 16 channels to choose from – if you get interference just change to another channel
- High quality dynamic microphone suitable for speech or music
- Transmitter runs on two cost effective AA batteries
- Receiver is a true diversity unit with twin tuners – add another transmitter and both talk at the same time!
- XLR & jack sockets on receiver to match all sound systems
- Transmitter supplied in high quality transit case
- Comprises TXA890 twin diversity receiver, TXS890HT hand-held microphone transmitter
- Professional quality
- Extra TXS890HT microphone transmitter available

The 16 UHF radiomic frequencies preset into the IMG Stageline TXS890 series of equipment (and allowing the user to program the TXS870 series to be used in conjunction with TXS890 series).
